## NEW TERMINAL 3 AT GRU AIRPORT INCREASES CAPACITY TO RECEIVE PASSENGERS, AIRCRAFTS AND CARGO

The Passenger Terminal 3 (TPS3) at GRU Airport began operations on May 11th, with the capacity to receive 12 million passengers per year in this first phase. Dedicated to international flights, the new terminal is comprised of 192,000 m<sup>2</sup> and is fitted with technology and equipment comparable to the best airports in the world.

The restricted area in the new facility is larger than the lounge area, following the model of the main Asian and European airports. The objective is to have passengers complete all pre-boarding procedures, such as: check-in, baggage check, security inspection and passport control, and then comfortably wait for their flights at the restricted area.

The apron has also been expanded, providing more aircraft stands and reducing waiting time. The new facility was also designed to receive larger (Code F) aircrafts. Currently, we have a Boeing 747-8 operating in the new terminal, flying the GRU-Frankfurt route. This means increased passenger and cargo capacity, including from air freighters.

With the new terminal and the two aprons, the airport increased the number of stands from 61 to 108. Starting at the second semester of the year, GRU Airport will be capable to receive cargo air freighters at any schedule, thus decreasing cargo unload times and making the clearance procedures faster.

With the opening of the new terminal, the apron in front of the cargo terminal will now be used for freighter carriers.

## GRU AIRPORT RECEIVE AIR FREIGHT CHARTER

In the early hours of May 22nd a chartered freighter landed at GRU Airport. Flight LH 8262 coming from Madrid, with 22 tons of cargo - 10 tons of pharmaceutical goods and 12 tons of automobile and electronic goods.

DHL Global Forwarding was responsible for negotiating the freighter with Lufthansa Cargo in order to meet a specific demand of a pharmaceutical industry. Being able to consolidate 100 pallets into a single flight, with the assurance of an efficient unloading and acceptance process and of cold storage at GRU Airport Cargo facilities was beneficial for the customer.

This operation represents the first step in a process to increase the number of air freighters to GRU Airport Cargo. The cargo commercial department works to service new partners, bring new flights and

to supply the demands of the logistics industry. After this trial operation, other flights are expected to start operating regularly in Guarulhos. Today, GRU Cargo already receives cargo aircrafts from ABSA, which weekly operates the international Miami-Guarulhos route, and the domestic Manaus-Guarulhos route daily.

According Cristina Bishop, Director of d DHL Global Forwarding's Produto Aéreo, since the beginning of negotiations in January of this year, GRU Airport demonstrated is was capable and ready to manage the operation. "This support gave us the needed confidence to move ahead with this important operation, which was flawlessly executed on May, 22nd. Dedication by all parties: DHL, Lufthansa Cargo and GRU Airport was essential to the success of this chartering," Cristina highlights. 

GRU Cargo is committed to increasing the number of freighter carriers and meet logistics demands.

## GRU CARGO INTERACTIVE WEBSITE OFFERS NEW SERVICES

**SOLICITE AQUI MESMO SEUS SERVIÇOS DO GRU CARGO.**  
SAIBA MAIS

**RASTREAR CARGAS E AGENDAR SERVIÇOS**

Através do login abaixo é possível consultar a situação da carga, status do processo de liberação da carga pela Receita Federal, além do resumo da operação que inclui valores, datas, horários e procedimentos. Para isso, basta se cadastrar e ter em mãos o AWB (Air Way Bill) do processo, também conhecido como Código de Conhecimento de Transporte Aéreo. Esta nova ferramenta também possibilita a solicitação de serviços, como:

- Apropriação de DSIC e alteração de dados no Mantra e Tecaplus
- Fotografia de carga
- Repesagem de carga
- Recontagem de volumes e carga

E em breve estenderemos essa facilidade para outros serviços prestados atualmente.

**LOGIN**

Faça o login para rastrear a sua carga.

In order to facilitate customer service and access to information, new features have been added to GRU Airport Cargo's interactive website. Some services that require booking can now be requested via the website, such as DSIC appropriation and data changing in Mantra and Tecaplus, cargo photos, cargo re-weighing, and recounting of cargo, under the link "Track Cargo and Schedule Services."

You can also monitor the cargo operation times and monthly stats. On the link "Statistics," a graph displays cargo acceptance and flight closing times.

Earlier issues of the GRU Cargo newsletter are also available on the site. New features will soon be added for all services provided by the Customer Service Desk. Visit the website: [www.grucargo.com.br](http://www.grucargo.com.br)

## COLD STORAGE FOR CARGO EXPORTS

The cold storage facility in the exports warehouse is fully functional, receiving different types of products that need to be kept under controlled temperatures.

During the first two months of operations more than 100 tons of cargo has been stored, assuring higher quality to exported products.

The cold storage facility was inaugurated in March, with a storage capacity of 1,700 m<sup>3</sup>, and 220 positions. For more information contact GRU Cargo's Commercial Department:
