SUBMISSION OF DIGITAL ENCLOSURES NOW ALLOWED BY TAX AUTHORITIES

TAX AUTHORITIES AT GRU NOW ALLOW ONLINE SUBMISSION OF DOCUMENTS ALONG WITH IMPORT STATEMENTS

With this new feature, Portal Único de Comércio Exterior begins to gradually eliminate paper use in foreign trade transactions.

Since March 2, customs brokers at GRU Airport Cargo may enclose digital copies of support documents when filing Import Statements (DI) at the Siscomex gateway. Aside from allowing other functionalities, the tool, launched in 2014 by the Federal Government, will centralize access to government services and systems by users who wish to secure authorizations, certificates and licenses for import or export transactions. By accessing the Visão Integrada do Comércio Exterior (VICOMEX) module, importers may now link invoices, air waybills and packing lists to an electronic file that will eventually be verified by all of the authorities involved in the process.

The procedure changes the way documents needed for cargo clearance are received by the three verification channels afforded by tax authorities (yellow, red and grey), which are now automatic. Dropping the need to submit hard copies of documents should considerably expedite cargo clearance, said Import Tax Authority team chief, Rodrigo Hiramuki, at a lecture delivered to professional brokers at GRU Airport on March 10.

Submission of digital enclosures will be optional for importers until June 31 and will then become mandatory as of July 1. Until such date, the traditional submission method will still be valid. "This interim period where both submission options are accepted will serve as a test phase that will be used for possible improvements, so it is important for importers to start using the new method as soon as possible," said Hiramuki.

The new method arrived at GRU Airport Cargo as a continuation to the pilot implementation project which began at Juscelino Kubitschek Airport in Brasília (FD), and at the Pecém (CE) and Paranaguá (PR) harbors. The

Enclosures may be submitted by accessing the Siscomex gateway, a tool developed to facilitate document processing in foreign trade transactions.

Online document submission will expedite cargo clearance

method is mandated by Normative Directive SRF 680/06 (as amended by IN RFB 1.532 of 12/19/2014) and by Directive 107/15, issued by the General Coordination Department of the Customs Authority (Coordenação Geral da Administração Aduaneira).

Due to current statutory provisions, procedures relating to airport management have not changed yet. GRU Airport Cargo, as a trusted cargo depository, still requires submission of hard copies of all documentary support. Integration with the digital method, which will gradually be expanded across the logistics chain, is currently being negotiated with tax authorities. Further details available at the Siscomex gateway at portal.siscomex.gov.br.

NEW TAM CARGO WAREHOUSE

TAM CARGO LAUNCHES ITS LARGEST CARGO TERMINAL AT GRU AIRPORT

New warehouse has stacking capacity of up to 11 meters and a total storage area of 15 thousand m²

TAM Cargo opens LATAM's largest and most advanced logistics terminal in Brazil at GRU Airport. Intended exclusively for local cargo operations, the new warehouse has a total area of 15 thousand m² and a 630-ton storage capacity and daily operations involving in excess of 630 tons. The vertical structure is 11 meters high - the highest among all LATAM cargo terminals in all of the countries where the group operates. The site has 14 merchandise entry docks equipped with scales, all with rising platforms that can be adjusted to suit variable truck heights.

During the opening ceremony on March 16, Tam Cargo General Director Luis Quintiliano said the positive results shown by GRU Airport during the past years justify all investments made by the company. GRU Airport president, Antonio Miguel Marques, said that opening the warehouse is a clear demonstration that the airline is confident about the airport's new management, at a time where the market is going through difficult times. "It is pleasure to receive a modern, high-quality structure. The trust that LATAM

Left to right: Marcus Santarém, Cargo Director, GRU Airport, Maria Fan, Cargo Business Manager, Antonio Marques, GRU Airport President and Luis Quintiliano, TAM Cargo General-Director.

has devoted bespeaks our efforts to consolidate GRU Airport as a leader in terms of cargo air transport in Brazil," said the officer.

The new warehouse employs about 300 employees and opens on a 24/7 basis. The facility offers clients exclusive parking facilities (79 in all), with flexibility to receive all types of vehicles. Peak hours at the terminal range from 8:00 am through 01:00 pm for merchandise collection and as of 05:00 pm for merchandise dispatch. The terminal will service mainly markets in the north and northeastern areas of Brazil and will transport, among other products, electronic equipment, car spare parts and machinery in general, in addition to perishable goods.

NEW CLIENTS AT GRU AIRPORT CARGO

GRU CARGO CLIENT BASE GREW 47% IN 2014

Greater number of cargo operations boost new client interest

Throughout last year, GRU Airport Cargo conquered over 8 thousand new clients. It is a figure that helps consolidate GRU's leadership on the air transport mode, meaning an expansion to 36% of market share.

Among the several factors that contributed to such growth in new client numbers, we may mention the company business department's efforts to seek new clients and business. The job done by the business department allowed a closer relationship with the market, and translated into more credibility and trust, thus increasing the number of clients by 47% when compared to 2013.

Add to that the investments the Concession grantor made in terms of improvements on infrastructure and in-house procedures, which turned the operation more efficient, productive and able to offer more competitive costs.

Another important aspect is greater flight availability: in addition to the daily 830 passenger flight take-offs and landings, which account for the greater part of cargo activities at GRU, four new cargo flights were introduced in Guarulhos – one coming from Basel, Switzerland, and another three weekly flights coming from Argentina –, all on top of the already existing weekly route from Miami and some other charter operations.

Cargolux makes a special delivery at GRU Airport Cargo

Cargolux, a cargo airline from Luxemburg, made an extra landing at GRU Airport on March 9. Boeing 747-400F, prefix number LX-UCV, landed at 10:29 pm after transporting an 18-ton helicopter. Flight CLX-768 did the Luxemburg (LUX) – Recife (REC) – Guarulhos (GRU) route and took off again at 00:30 am on its way to Campinas (VCP).

Cargolux has regular flights to Brazil and operates at cities such as Campinas, Curitiba, Manaus and Petrolina. The Guarulhos operation is in line with GRU Airport's commercial strategy to expand the offer of cargo flights at Brazil's largest airport.

GRU NOW AT INTERMODAL. THAT MEANS MORE TIME FOR RETAGGING

GRU AIRPORT CARGO AT INTERMODAL SOUTH AMERICA 2015

From April 7 through 9, GRU Airport Cargo will be present at the 2015 edition of Intermodal South America, the most important logistics trade fair in the Americas and one of the largest in the world for that line of business. The event will bring together over 600 exhibitors of all types of cargo transport modes and expects to receive almost 48 thousand visitors. Over 30 countries will be represented at the fair.

As already done since it began to manage Guarulhos Airport Logistics Terminal, GRU Airport Cargo will use the event as a springboard to divulge investments made and plans for next year, do new business and strengthen customer relations. Intermodal will be held at Transamerica Expo Center, in São Paulo, from 1:00 pm to 9:00 pm. Further details available at the event's official website: <http://www.intermodal.com.br/pt/>.

STAY ALERT: Tax authorities expand timeframe for parcel retagging

As of March 23, cargo operators needing to retag parcels due to flaws or errors on the identification tag may request correction timeframes from 09:00 am to 05:00 pm on business days. Formerly, the procedure could only be applied for until 02:00 pm. The change was authorized by Directive ALF/GRU Nº 109, published on the Federal Government's Official Gazette on 03/18/2015.

To such end, importer/exporter legal representatives should file retagging applications at GRU Airport Client Service Department (CAC) along with the following documents: a copy of the air waybill, the packing list, MAWB and/or HAWD labels, the invoice and an application form specifying the indented correction.

Three more hours afforded for Identification tag correction

Some changes recently introduced on CAC's internal routines, such as expanded number of filings sent to tax authorities seeking correction will also help cutting down the time needed for such applications.
